

Jira Software

What is Jira Tool :-

- The full form of JIRA is borrowed from the **Japanese** term “**Gojira**” which means “**Godzilla**”.
- **Jira** is a **project management** and **issue-tracking tool** developed by **Atlassian**.
- It is mainly used by **software development teams** to **plan, track, and manage work** like tasks, bugs, and projects.

Why Do We Use Jira?

- To **manage projects**
- To **track bugs and issues**
- To **assign tasks to team members**
- To **monitor project progress**
- To **follow Agile methods** (Scrum & Kanban)

Key Features of Jira :-

➤ Issue Tracking :-

- Task
- Bug
- Story
- Epic

➤ **Project Management :-**

- Track who is working on what
- Set priorities and deadlines

➤ **Agile Support :-**

- Scrum boards
- Kanban boards
- Sprint planning

➤ **Workflow Management :-**

- Custom steps like:
- To Do → In Progress → Testing → Done

➤ **Reports & Dashboards :-**

- Burndown charts
- Velocity charts
- Progress reports

Where Is Jira Used?

- Software development companies
- IT projects
- Agile & DevOps teams
- Bug tracking in applications

Example :-

Suppose you are building a **Study Forum project** :

- Create a **project** in Jira
- Add tasks like:
 - Design UI
 - Backend API development
 - Database setup
 - Testing bugs
- Assign tasks to team members
- Track status until completion

Jira vs Simple To-Do List :-

Jira	To-Do-List
Team Use	Personal Use
Tasks + bugs + reports	Basic tasks
Full progress tracking	No tracking

1. Create Jira Account

Step 1 : Click on “Get Jira Free” :-

Step 2 : Creating an Atlassian Account :-

Step 3 : To complete the setup and login, click the verification link in the email box.

The image shows the Jira sign-up page. At the top, there is a navigation bar with the Jira logo, a search icon, and links for Features, Solutions, Guide, Templates, and Pricing. A 'Get it free' button and a 'Sign in' link are also present. The main content area has a light blue background. On the left, it says 'Focus on outcomes, not admin' and 'AI-powered project management that removes the work around work.' On the right, there is a 'Work email' input field with the placeholder 'you@company.com'. Below it, a note says 'Using a work email helps find teammates and boost collaboration.' A blue 'Sign up' button is below the email field. Further down, there is a section 'Or continue with' followed by a 'Google' login option with the Google logo.

Step 4 : Click on Software Development.

The image shows the 'What kind of work do you do?' selection screen in Jira. The title is 'What kind of work do you do?' with a subtitle 'This helps us suggest templates that help your team do their best work.' Below the title, there is a grid of 14 buttons, each with an icon and a label. The first button, 'Software development', is highlighted with a blue border and a right-pointing arrow. The other buttons are arranged in two columns. The labels are: Software development, Product management, Marketing, Design, Project management, Operations, IT support, Human resources, Customer service, Legal, Finance, Sales, Data science, and Other.

What kind of work do you do?	
Software development →	Product management
Marketing	Design
Project management	Operations
IT support	Human resources
Customer service	Legal
Finance	Sales
Data science	Other

2. Create First Project

Step 1 : There are show in left side content

Step 2 : Click on Software Development

Space templates

Step 6 : Then successfully project are create and show its interface

3. How to create components

What is Components

- In Jira, a Component is a way to **group issues** within a project into smaller, functional parts, like **modules, teams, or features**

Step 1 : Firstly we can create the components

This project doesn't have any components, yet

Components are subsections of a project.
Use them to group issues within a project into smaller parts.

[Create component](#)

Version	Status	Progress	Start date	Release date	Description	More actions
v1.1	UNRELEASED	No work items			This is version one	...

5. Create a issue

Step 1 : Firstly click on List

The screenshot shows the Jira interface for the 'Study_Forum' space. At the top, there is a search bar and a '+ Create' button. Below the search bar, the 'Spaces' section shows 'Study_Forum' with a menu icon. A navigation bar includes 'Summary', 'Reports', 'List' (which is selected and highlighted), 'Forms', 'Components', 'Development', 'Code', 'Releases', and 'Archives'. Below the navigation bar, there are filter options: 'Ask AI', 'Basic' (selected), 'JQL', a search bar, 'Project = Study_Forum', 'Assignee', and 'Saved filters'. At the bottom, there are more filters: 'Type', 'Status', 'More filters', and 'Clear filters'.

Step 2 : Then fill the required fields

The screenshot shows the 'New task' form in Jira. At the top, there is a checkbox labeled 'New task' and three icons: a minus sign, a refresh icon, and a close icon. Below the form title, a note states 'Required fields are marked with an asterisk *'. The form contains the following fields:

- Space ***: A dropdown menu showing 'Study_Forum (SF)'.
- Work type ***: A dropdown menu with 'Task' selected.
- Status**: A dropdown menu with 'TO DO' selected.
- Summary ***: A text input field.
- Parent**: A dropdown menu with 'Select parent'.

At the bottom, a note states: 'Your work type hierarchy determines the work items you can select here.'

6. Jira Board and its Types

What is Jira Board :-

- Jira board is a popular **bug-tracking** and **issue-tracking tool** developed by Atlassian for teams.
- It is widely used in the **software industry**.
- The agile board is a **tool in jira** that helps teams to **plan** and **manage their work efficiently**.
- It will show tasks in **columns** that represent **different stages** of the **workflow**, from **project started** to project progress to **completed**.

Key Jira Board Types

Scrum Board :

- **Best For:** Scrum Board is best for **teams that work in short time periods called sprints**
- **Features:** Includes **Backlog for planning**, **Active Sprints** for current work, and typically uses **story points and sprint metrics**.
- **Goal:** Deliver **increments** of work in **fixed time periods**.

Steps of Creating Scrum Boards :-

Step 1 : Land on the Jira Login Page. If You Don't have an account Click here for the steps to create an account.

The image shows the Atlassian Jira login page. At the top is the Atlassian logo. Below it, the text "Log in to continue" is displayed. There is a text input field labeled "Enter your email" and a blue "Continue" button. Below this, the text "Or continue with:" is shown, followed by four social login buttons: Google, Microsoft, Apple, and Slack. At the bottom, there are links for "Can't log in?" and "Create an account".

Step 2 : Login with your account.

Step 3 : After Login, you will be landed on New Page.

Step 4 : Under the project tab Click on 'Create Project'.

Step 5 : From the options of different templates Select 'Scrum' Template.

Step 6 : Click on 'Use This Template'.

Create a board

Sprint towards your team objectives with a board, backlog, and reports.

Step 12 : Bug are is going to In Progress

Step 13 : Bug are goes to Done it means task can solve successfully

Step 14 : Task can done then click on Complete sprint then it can show interface

Kanban Board :

- **Best For:** Teams focused on **continuous delivery** and **workflow efficiency**, like **support or operations**.
- **Features:** Manages **work-in-progress (WIP) limits** and Work moves step by step (**To Do** → **In Progress** → **Done**) without fixed deadlines like sprints.
- **Goal:** The main goal of a Kanban Board is to **see all work clearly, reduce delays, and deliver tasks faster and smoothly**.

Steps of Creating Kanban Boards :-

Step 1 : Log in to your Jira Account.

Step 2 : Under the Project tab. Click on 'Create Project'.

Step 3 : This time instead of the Scrum template, Click on Kanban.

Step 4 : Click on 'Use Template'.

Kanban

Use template

Kanban (the Japanese word for "visual signal") is all about helping teams visualize their work, limit work currently in progress, and maximize efficiency. Use the Kanban template to increase planning flexibility, reduce bottlenecks and promote transparency throughout the development cycle.

Track work using a simple board

Work items are represented visually on your kanban board, allowing teams to track the status of work at any time. The columns on your board represent each step in your team's workflow, from to-do to done.

[Learn more about kanban boards](#)

Step 7 : You have Successfully Created the Kanban Board.

The screenshot shows the Jira Software interface. On the left sidebar, the 'Board' option is highlighted. The main area displays the 'KAN board' with columns for 'TO DO', 'IN PROGRESS', and 'DONE'. A 'Quickstart' panel on the right provides guidance on using Kanban.

Created By – Nikhil Shinde

Difference Between Scrum Board and Kanban Board :-

Feature	Scrum Board	Kanban Board
Workflow	Work is done in fixed time periods called sprints)	Work flows continuously , no fixed time period
Planning	Work is planned before starting a sprint	Planning is flexible , tasks can be added anytime
Backlog	Backlog is mandatory and divided into sprints	Backlog is optional and not sprint-based
Roles	Fixed roles like Scrum Master, Product Owner, Team	No fixed roles , focus on workflow
Work Limit	No strict limit during sprint	Uses WIP limits to avoid overload
Metrics	Story points, sprint capacity, velocity	Cycle time, throughput
Best For	Teams working on new features and planned releases	Teams handling support, bugs, operations

7. Report Management in Jira:-

Agile

Burndown Chart

Track the total work remaining and project the likelihood of achieving the sprint goal. This helps your team manage its progress and respond accordingly.

Burnup Chart

Track the total scope independently from the total work done. This helps your team manage its progress and better understand the effect of scope change.

Sprint Report

Understand the work completed or pushed back to the backlog in each sprint. This helps you determine if your team is overcommitting or if there is excessive scope creep.

Velocity Chart

Track the amount of work completed from sprint to sprint. This helps you determine your team's velocity and estimate the work your team can realistically achieve in future sprints.

Cumulative Flow Diagram

Shows the statuses of issues over time. This helps you identify potential bottlenecks that need to be investigated.

Version Report

Track the projected release date for a version. This helps you monitor whether the version will release on time, so you can take action if work is falling behind.

Epic Report

Understand the progress towards completing one Epic over time. This helps you manage your team's progress by tracking the remaining incomplete/unestimated work.

Control Chart

Shows the cycle time for your product, version or sprint. This helps you identify whether data from the current process can be used to determine future performance.

Epic Burndown

Track the projected number of sprints required to complete your Epic (optimized for Scrum). This helps you monitor whether your Epic will release on time, so you can take action if work is falling behind.

Release Burndown

Track the projected release date for a version (optimized for Scrum). This helps you monitor whether the version will release on time, so you can take action if work is falling behind.

DevOps

Cycle Time Report

Understand how much time it takes to ship issues through the deployment pipeline and how to deal with outliers.

Deployment Frequency Report

Understand your deployment frequency to understand risk and how often you are shipping value to your customers.

Issue analysis

Average Age Report

Shows the average age of unresolved issues for a project/filter. This helps you see whether your backlog is being kept up to date.

Created vs. Resolved Issues Report

Maps created issues versus resolved issues over a period of time. This can help you understand whether your overall backlog is growing or shrinking.

Pie Chart Report

Shows a pie chart of issues for a project/filter grouped by a specified field. This helps you see the breakdown of a set of issues, at a glance.

Recently Created Issues Report

Shows the number of issues created over a period of time for a project/filter, and how many were resolved. This helps you understand if your team is keeping up with incoming work.

Resolution Time Report

Shows the length of time taken to resolve a set of issues for a project/filter. This helps you identify trends and incidents that you can investigate further.

Single Level Group By Report

Shows issues grouped by a particular field for a filter. This helps you group search results by a field and see the overall status of each group.

Time Since Issues Report

For a date field and project/filter, maps the issues against the date that the field was set. This can help you track how many issues were created, updated, etc, over a period of time.

Forecast & management

Time Tracking Report

Shows the original and current time estimates for issues in the current project. This can help you determine whether work is on track for those issues.

User Workload Report

Shows the time estimates for all unresolved issues assigned to a user across projects. This helps you understand the user's workload better.

Version Workload Report

Shows the time estimates for all unresolved issues assigned to a version, broken down by user and issues. This helps you understand the remaining work for the version.

Other

Workload Pie Chart Report

A report showing the issues for a project or filter as a pie chart.

8. What is Project Management in Jira?

What is Project Management :-

- Project Management in Jira means **planning, organizing, tracking, and completing project work** using **Jira tools**.
- Jira helps you **manage tasks, people, and progress** in one place.

What Does Jira Do for Project Management?

- **Create a Project :-**
 - Example : Study Forum Project
 - All work is managed inside one project.
- **Create Tasks (Issues) :-**
 - Tasks, Bugs, Stories, Epics
 - Example: Design Login Page, Fix Login Bug
- **Assign Work :-**
 - Assign tasks to team members
 - Set priority and due date
- **Track Progress :-**
 - See task status:
 - To Do → In Progress → Done
 - Use boards (Scrum / Kanban)
- **Plan Work :-**
 - Sprint planning (Scrum)
 - Backlog management
 - Set deadlines

➤ **Monitor & Report :-**

- View reports:
 - Burndown chart
 - Progress reports
- Identify delays and issues

Example :-

For a **college project**:

- Create a Jira project
- Add tasks like:
 - Database design
 - Backend API
 - Frontend UI
- Assign tasks
- Track progress till project completion

Why Jira is Useful for Project Management?

- Keeps work **organized**
- Improves **team communication**
- Helps deliver work **on time**
- Supports **Agile methods**

9. Create Backlog :- Backlog = Future

Step 1 : Click on Backlog

Step 2 : It can show Backlog

10. How to create a sub – task

Step 1 : Click on task

Step 2 : Click on Create subtask and then show this interface :-

Step 3 : There are add subtask and create it and it can show SF-5 SF-6

Subtasks

... +

11. Basic Jira Interview Questions

Common questions

1. What is Jira?

:- Jira is a **project management** and **issue-tracking** tool used to plan, track, and manage work.

2. Why do we use Jira?

:- To **organize tasks**, **track progress**, **manage bugs**, and **deliver projects on time**.

3. What is an Issue in Jira?

:- An issue is a **task or work item** like a **bug**, **story**, or **task**.

4. What are Issue Types?

:- Common issue types are **Task**, **Bug**, **Story**, and **Epic**.

5. What is a Project in Jira?

:- A project is a **container** where all related issues are managed.

Agile & Boards Questions

1. What is a Scrum Board?

:- A board used for **working in sprints** with planned work.

2. What is a Kanban Board?

:- A board used for **continuous work flow** without sprints.

3. Difference between Scrum and Kanban?

:- Scrum uses **sprints**, Kanban uses **continuous flow**.

4. What is a Sprint?

:- A sprint is a **fixed time period** (1–4 weeks) to complete planned work.

5. What is a Backlog?

:- A backlog is a **list of all pending work** for the project.

Roles & Workflow Questions

1. What is a Workflow in Jira?

:- Workflow is the steps an issue follows, like To Do → In Progress → Done.

2. What is a Scrum Master?

:- A person who helps the team follow Scrum rules.

3. What is a Product Owner?

:- A person who decides what work should be done first.

Reports & Metrics :-

1. What is a Burndown Chart?

:- A chart that shows how much work is left in a sprint.

2. What are Story Points?

:- Story points are used to estimate task effort.

Practical Questions :-

1. How do you track progress in Jira?

:- Using boards, issue status, and reports.

2. How Jira helps in project management?

:- It helps in planning, assigning, tracking, and reporting work.

3. Is Jira only for developers?

:- No, Jira can be used by any team.

4. What is WIP limit?

:- WIP limit restricts too many tasks in progress at once.

5. Where is Jira used?

:- In software development, IT, Agile, and DevOps projects.
